

MAKING OF

Edrington

We can also do XXL

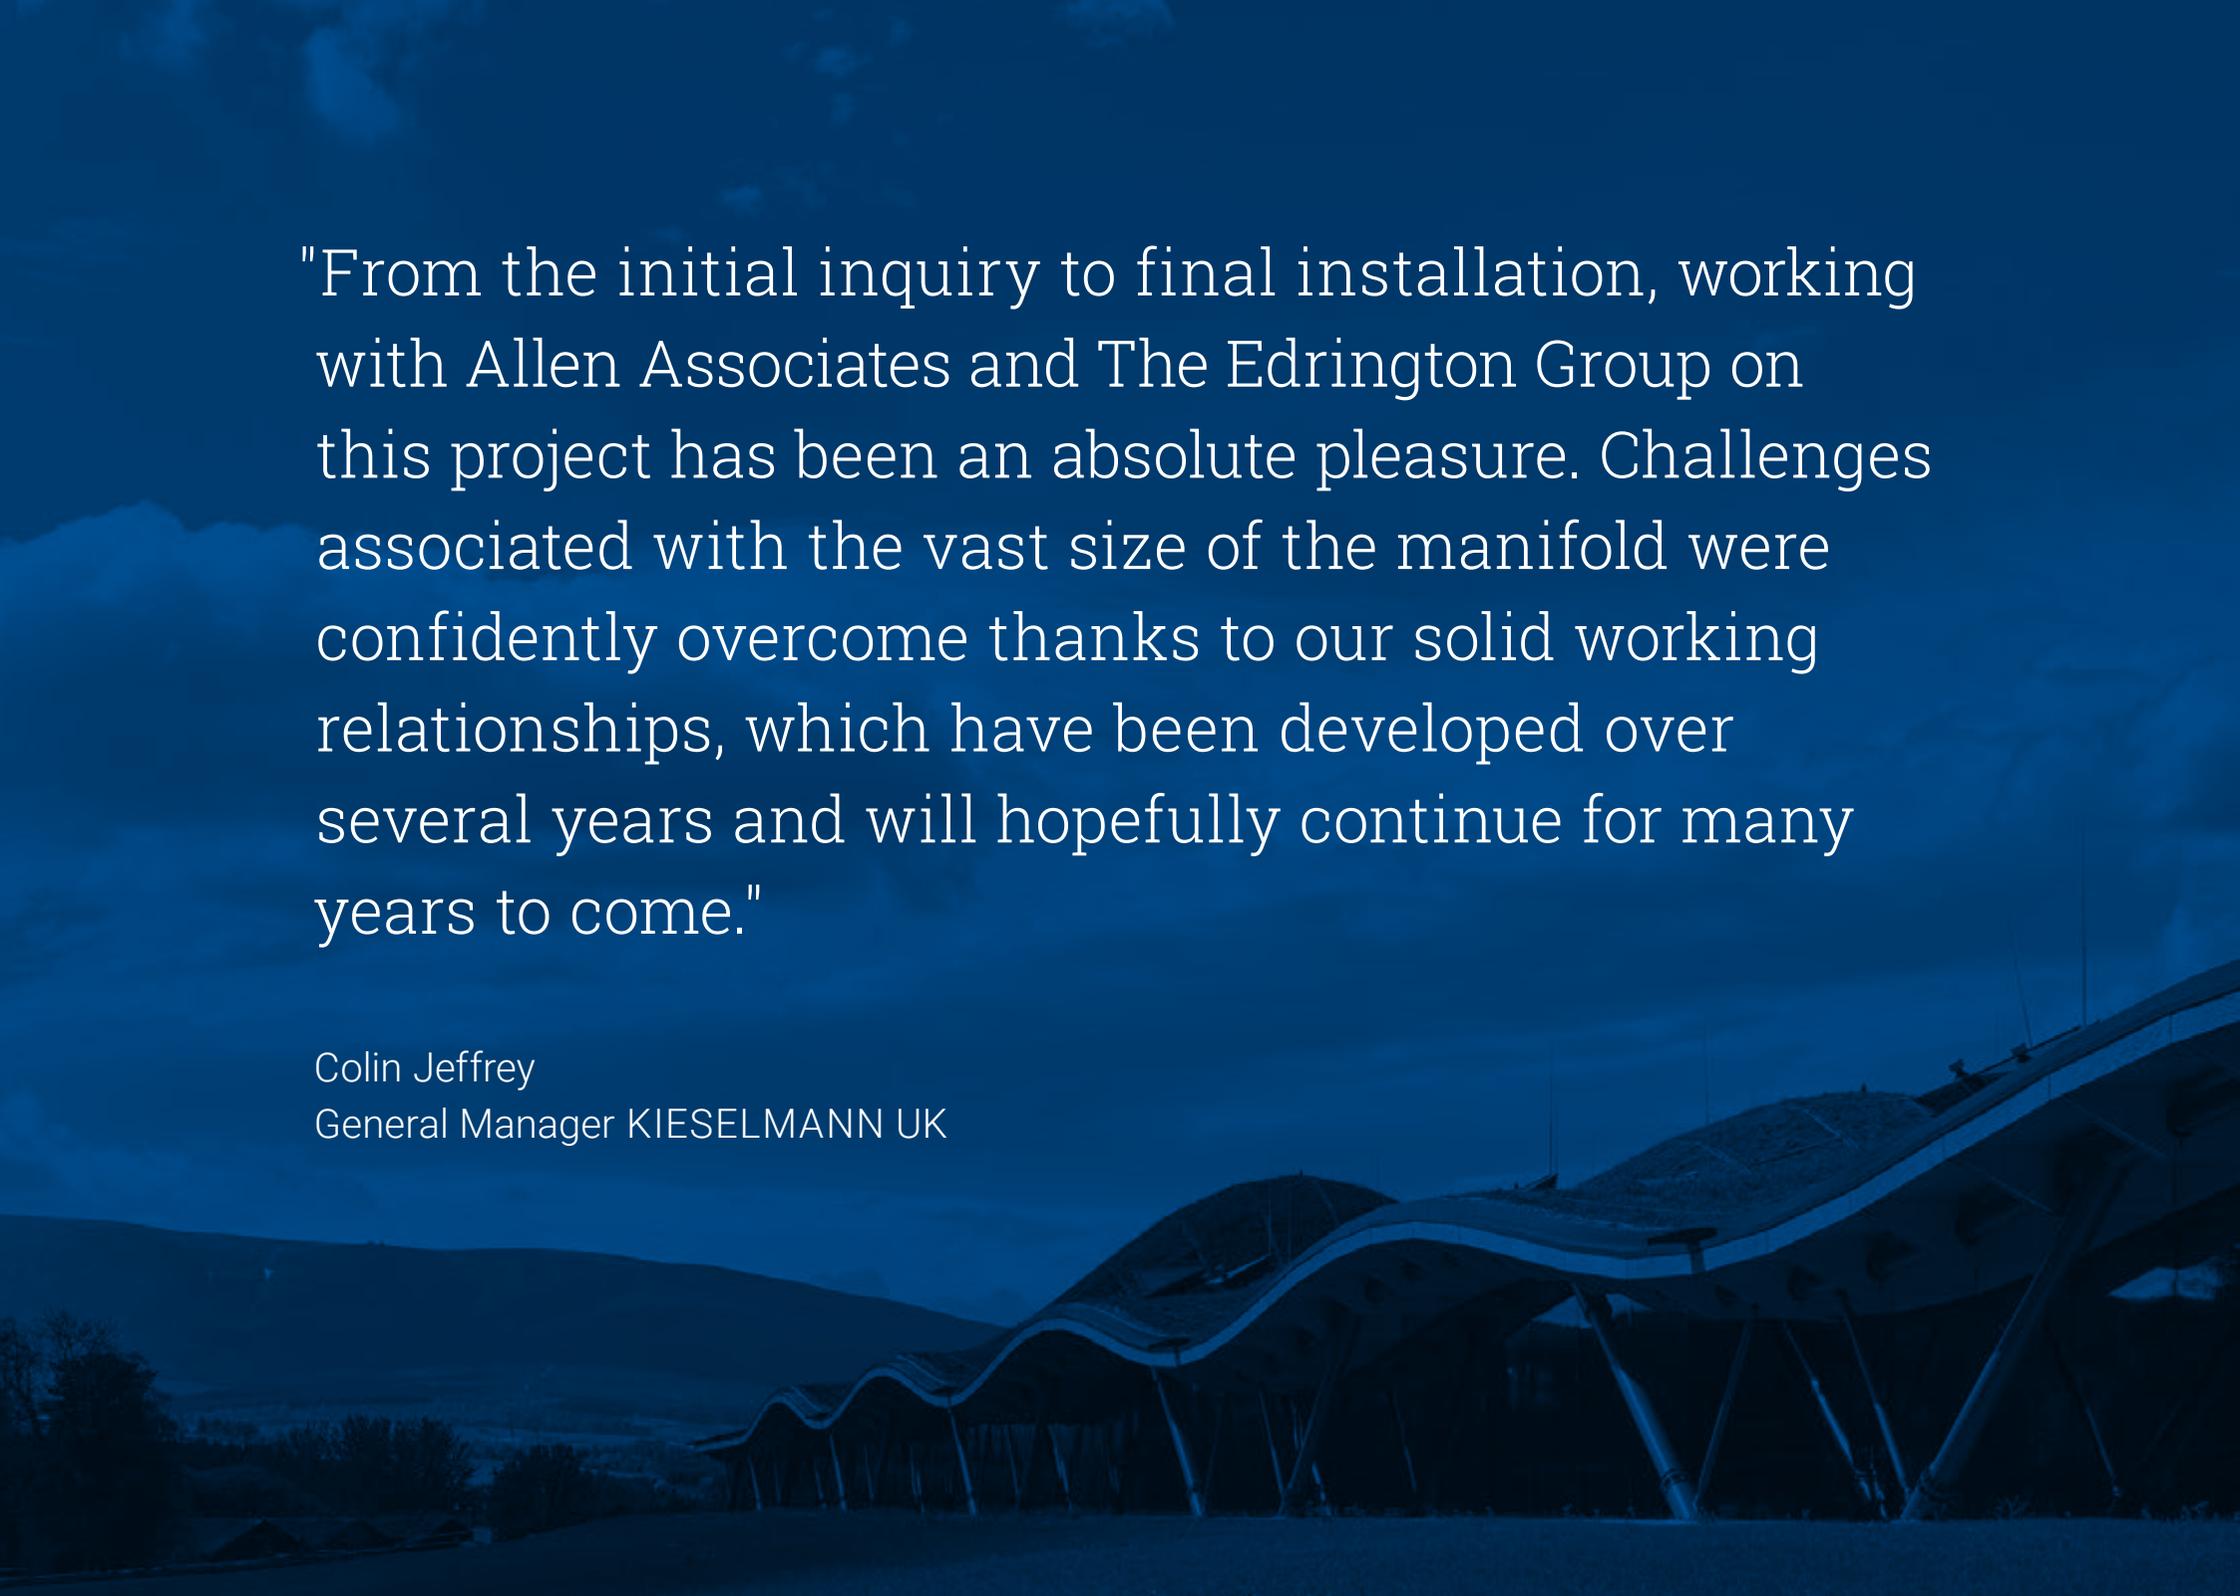

KIESELMANN

FLUID PROCESS GROUP

"From the initial inquiry to final installation, working with Allen Associates and The Edrington Group on this project has been an absolute pleasure. Challenges associated with the vast size of the manifold were confidently overcome thanks to our solid working relationships, which have been developed over several years and will hopefully continue for many years to come."

Colin Jeffrey
General Manager KIESELMANN UK

EDRINGTON

The Edrington Group comes from a time-honoured Scottish family. For over 160 years, the brands of the Edrington distilleries have stood for the highest whisky enjoyment.

Above all, single malts such as "The Macallan". The most expensive whisky in the world to date also comes from this distillery: in 2019, a 60-year-old "Macallan 1926 Single Malt" was sold for over €1.7 million.

KIESELMANN can also do XXL. For the Edrington Group, we manufactured the largest valve manifold in our company's history. The XXL manifold measures 4.90 metres x 7.90 metres and is assembled from 25 single manifolds.

- > Order volume: around 1.2 million euros
- > 359 double-seat valves with *k-flex* seals
- > 37 butterfly valves with pneum. actuator
- > 407 NAMUR control heads
- > 18 inline 3" housings
- > 25 single manifolds

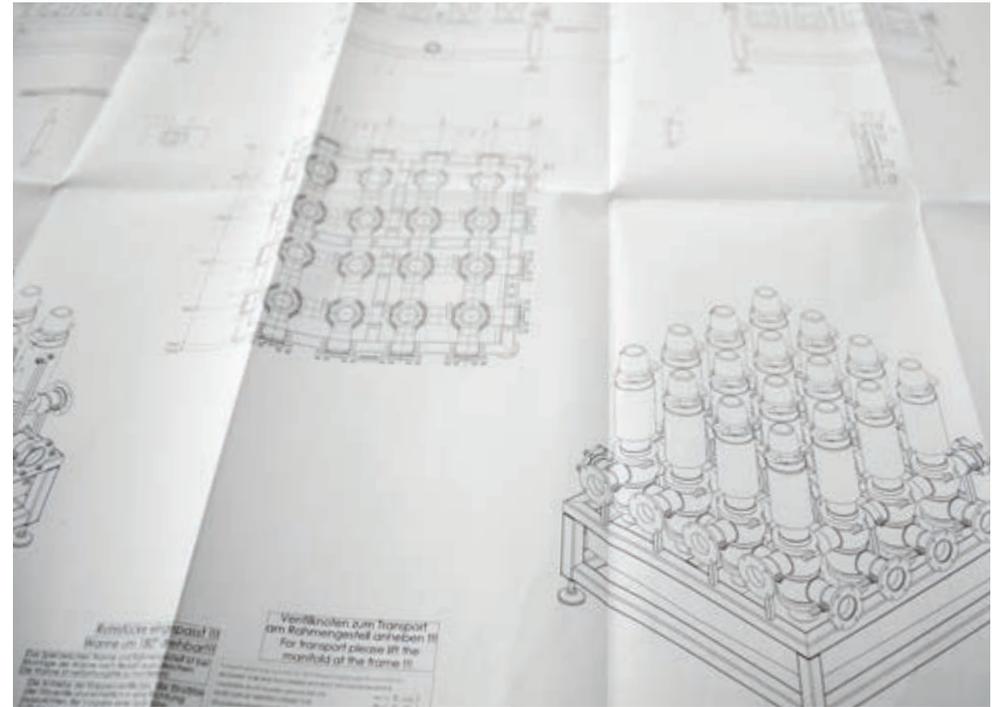

We owe this order to our production and service quality and our man on the island, Colin Jeffrey from KIESELMANN UK.

Passion for quality

KIESELMANN, a name that has always stood for Swabian innovation, care and quality awareness.

We are a passionate family business. Founded in 1937 as a small subcontracting mill, we have developed the position of a leading manufacturer of fluid technology. The KIESELMANN FLUID PROCESS GROUP was created through acquisitions and investments. This group of expanding companies acts as an experienced partner and full service provider. The KIESELMANN FLUID PROCESS GROUP offers solutions for all fluid technology tasks. From storage to valve and system engineering to plant construction.

We are makers who realise projects. Our stainless steel components are durable, are of high-quality and set standards. We do not want to be the cheapest – we want to be the best. A maxim that we share with our customers.
